

# Timeslot Management

Prevent traffic jams and easily manage the workflow around your docks.

As a logistics service provider, your company thrives on a large number of logistical movements: goods that enter and leave your warehouse. It can, therefore, be very crowded in your yard. But how do you prevent the well-known peak hours? Does it feel like an impossible job to plan the necessary resources? Is the workload overwhelming at for example 9 am but do colleagues sit back and twiddling their thumbs around 2 pm? Or do carriers and customers complain about the long waiting times on your docks?

Decrease the workload for your warehouse employees, unburden your office staff and give your customers and carriers the opportunity to reserve a suitable time slot themselves, tailored to the capacity of your warehouse. Accelerate and simplify the process from A to Z with Elevate-IT's Timeslot Management. A tool that makes queues of waiting trucks vanish like frost under the morning sun and makes you become the favorite of your customers and suppliers.

### **Always insight into the capacity of your docks**

Register and maintain your docks in the WMS system and give yourself the opportunity to realize a better occupancy rate. This does not end with the option of reserving a time slot per dock. Because our software also offers the possibility to register the capacity per time slot. For example in hours and/or the number of pallets. In addition, it becomes very easy to set up the maximum available capacity per day per customer and/or carrier. The result: everyone knows - from your employees to your customers and carriers - where they stand and you are in full control.

### **Say goodbye to traffic jams at your docks**

Align your resources to the expected workload and increase the speed on your docks with an automated process. By agreeing on time zones with transporters when they are welcome to arrive, you divide the workload into your warehouse. You know which cargo arrives at what time and you can also accompany them to the most ideal dock with Yard Management. Before you know it, the truck is unloaded and the driver is on his way again.

### **Fully automated and supreme efficient**

Let your employees work on tasks that really matter and automate drivers' arrival process. Because except for the driver himself, no employee is involved. Thanks to our Timeslot Management solution, carriers reserve a time slot in advance and know exactly the timeframe they can load and/or unload. Upon registration, the carrier receives a unique code. Once the driver checks-in at the gate the system whether this is correct and if the driver is on time. Is both the case? Then the system sends an EDI message to the automatic gate, which opens afterwards. The drivers' application then shows at which loading dock he is expected. No queues, no confusion and no mistakes. Exactly as you want it.

### **Maintain a high level of attention to your customers' needs**

In your warehouse, everything revolves around efficiency. The same applies to your colleagues in transportation. In their situation, time literally equals money. Unnecessary waiting in traffic jams or at your warehouse is something they'd rather avoid. Make your customers and carriers happy and give them the opportunity to request online timeslot bookings. This way they know exactly when they are expected and that they are helped right away. In this way, their trucks are unloaded in no time and on their way to their next address.

### **Give drivers access via our HTML platform**

Create an efficient process and give drivers the possibility to arrange everything themselves via the HTML5 platform. They can already fill in the required information upfront, receive an entry ticket and as soon as the driver arrives the gate opens automatically. In this way, you avoid chaos on your yard, reduce waiting times at the gate and guarantee a smooth process at your warehouse.

### **The benefits at a glance**

- Automate the access to your warehouse
- Prevent queues at your entrance gate
- Create efficiency for you and your partners
- Always know what arrives, when and where
- Divide the work load for your employees
- Stimulate optimal passage of trucks

#### **Who are we?**

We are people with a passion for IT! Elevate-IT was founded by driven consultants with years of experience. As specialists, we know the tricks of the industry and above all, we enjoy what we do! Our team consists of enthusiastic consultants with a healthy dose of ambition. Elevate-IT means innovation, growth, and the future!
